Johnson County Executive Airport  
Informational Facts

(REVISED May 13, 2015)

Aviation Facts

- The Federal Aviation Administration three-letter identifier for Johnson County Executive Airport is “OJC.”
- There were 49,543 annual aircraft operations in 2014, making it the 3rd busiest airport in Kansas.
- There are an estimated 210 aircraft based at OJC.
- OJC has one runway, Runway 18/36, which measures 75’ x 4,099’ and is limited to aircraft weighing no more than 12,500 pounds.
- There are localizer/DME approaches for the runway at OJC, as well as published GPS (global positioning system) and non-precision approaches to the field.
- OJC has 128 existing t-hangars. The Airport Commission maintains a t-hangar waiting list with an estimated wait-time of 5+ years. Rental rates range from $275 - $375 per month, depending on size.
- The Airport Commission receives a “fuel flowage fee” (.10/gallon) on all fuel sold at OJC.
- KCAC Aviation and Air Associates are the airport’s two FBOs (Fixed Base Operators) which operate 24 hours per day at OJC.
- OJC has a federal control tower (funded by the Federal Aviation Administration (FAA) under their contract tower program) that operates from 1300Z – 0300Z (7 a.m. to 9 p.m.) seven days a week.
- Fire coverage for OJC is provided by the City of Olathe Fire Department.
- A portion of land in the runway protection zone at New Century AirCenter is leased out for agricultural use.
