**Johnson County Department of Health and Environment
surveys population a second time about coronavirus symptoms**

JOHNSON COUNTY, KAN. (April 21, 2020) – Johnson County Department of Health and Environment (JCHDE) is again asking Johnson County residents to complete a short survey in order to help us understand how many people in Johnson County have or do not have symptoms of coronavirus (COVID-19).

The survey will be available starting Tuesday, April 21st at 10 a.m. and will close on Friday, April 24th at 10 a.m. Survey link: [Population Health Survey](#)

This short survey asks about your symptoms or lack of symptoms, demographic and contact information. The survey should be completed for every member of the household. The information is confidential and will only be used by JCDHE to determine how COVID-19 is spreading in the community. The survey is also available in Spanish.

You will be asked to do this same survey several more times in the next few weeks in order to compare results. Some residents who complete the survey will be invited to get tested for COVID-19 at a future JCDHE drive-thru testing clinic.

“Please fill out the survey accurately and completely for each person in the residence. Completing the survey is voluntary, but we ask that as many people as possible participate every time you are asked, to recognize how the coronavirus is spreading in the community”, states Dr. Sanmi Areola, JCDHE director.

If the public has questions about the survey they can call the Johnson County Community Hotline at 913-715-2819, Monday-Friday, 8 a.m. to 5 p.m. or visit www.cdc.gov/COVID19 or www.jocogov.org/coronavirus or <https://govstatus.egov.com/coronavirus> for more information about COVID-19.
