Private Care Management

Why choose Private Care Management?

Learning about and coordinating services for seniors can be time consuming and challenging for families and caregivers. It is even more challenging when you live far away from your loved ones and they need help NOW. Johnson County Area Agency on Aging can help you through our Private Care Management service.

How Does it Work?

Serving seniors and helping them remain in their home is what we do. Our case management staff will complete a thorough assessment, develop a detailed plan of care, and guide you through the network of services available in the community. The plan of care is the key to this process. Our knowledge of federal, state, and local resources will be available as the plan of care is developed for your unique situation.

Private Care Management Services Make Sense.

For a set fee we will work with the family and seniors to assess needs, develop a plan, and coordinate supportive services. In most cases a five-hour block of time will provide the help you need. This will provide you with the information, guidance, and coordination, if needed, to connect with local community resources and services. Additional case management services for support and assistance can be contracted on an as-needed basis.

With the ever increasing cost of nursing facility care, we strive to help seniors remain as independent as possible in their own home and community by connecting them with in-home services. The Area Agency on Aging serves seniors in Johnson County and their concerned family members wherever they might live.
