Mr. VonAhnen discussed the current process being undertaken to secure an electronic health record system for the agency. This system will replace an outdated document records system that has been recently problematic in accuracy and security. JCDS is working with the county's information technology staff and is at the stage of considering which of several programs that were evaluated would be of most benefit to the agency. Additional county departments worked on this endeavor as well and the system chosen will be one that has many additional functions to the one currently used. Additional billing, nursing, and report capabilities will be included and the new system is expected to replace another wage payment system for individuals served that should save several thousand dollars a year.

The board asked to see a vendor presentation when the software is selected.
