

Sanitary Sewer Improvements Planned for Your Neighborhood

January 10, 2020

Notification of Field Activity

Metcalf and 103rd Interceptor Relocation and Capacity Improvements Project

Dear Property Owner/Local Business Owner:

Johnson County Wastewater (JCW) is working to increase capacity of the sanitary sewer system in your neighborhood around the intersection of Metcalf Avenue and 103rd Street in Overland Park, Kansas. This will provide more dependable, cost-effective, and environmentally sound wastewater service to our customers. Our team of engineers, inspectors, and surveyors are continuing these efforts and designing the replacement of existing sanitary sewers in your neighborhood.

How will my property be directly impacted?

Field investigations and surveying activities may be needed on or near your property to gather topographical, surface, and subsurface feature data that will be used in the design. These investigations and activities will be performed by Burns & McDonnell, Kaw Valley Engineering, and Terracon as contractors for JCW. Their personnel will carry photo identification during these activities. These contractors will not require access inside your home or business.

What is the schedule for this effort?

Prior to construction, the existing features of the sewer system must be surveyed and the alignment identified. The information collected will then be used to prepare construction plans. Field investigation and surveying activities are scheduled to begin immediately and will last for several months.

What do you need from me?

In an effort to encourage property owner involvement, we are asking for your assistance and input as we proceed with the design phase of the project. Knowing your concerns early in the process will allow us to respond and, if possible, incorporate them into the design phase. The requested information will help us to move forward with this beneficial project.

How do I provide input about my property?

Please complete and mail the enclosed form back to:

Burns & McDonnell
Attn: Waldo Margheim
9400 Ward Parkway
Kansas City, MO 64114

Or, if you prefer, an electronic copy of the request for information form is available on our project website which may then be emailed back to us at wamargheim@burnsmcd.com.

Wastewater

Will I receive additional information as the project moves forward?

Yes, as the design progresses, those properties that will be directly affected by construction will be identified and the owners of those properties will receive additional correspondence that explains the work to be performed on their property. Then, additional notifications will be made prior to construction.

Who can I contact if I have questions?

If you would like additional information or have any questions or concerns about this project, please contact myself or Waldo Margheim at:

Telephone: 816-844-4641

Email: wamargheim@burnsmcd.com
