

Wastewater

Industrial Pretreatment Program

Chemical Data Annual Update- 2020

Company Name: _____

Requirements specified in Part III of the Industrial Wastewater Discharge Permit issued to this company state that an annual listing of chemicals stored, approximate quantity and location be submitted to Johnson County Wastewater. Minimum reportable quantities are five (5) gallons for liquid chemicals and five (5) pounds for dry chemicals. The listing shall include Material Safety Data Sheet / Safety Data Sheet information as noted on the enclosed reporting table. A review of the Plan on file with Johnson County Wastewater has been performed by this company. The following statement reflects the finding of the review.

(Check One)

I hereby certify that the chemical inventory list, manufacturer information, storage location(s) site plan and quantity list on file at Johnson County Wastewater for the preceding year are current and do not require any additions or deletions. Current Material Safety Data Sheets / Safety Data Sheets for the chemicals on the list are present and maintained at the company specified above.

The chemical inventory list, manufacturer information, storage location(s) site plan and/or quantity list on file at Johnson County Wastewater for the preceding year are no longer current. Current inventory list, manufacturer information, storage location(s) site plan and quantity list are enclosed. Current Material Safety Data Sheets / Safety Data Sheets for the chemicals on the list are present and maintained at the company specified above.
